

## E<sup>3</sup>UDRES<sup>2</sup> Intensive I Living Labs @ St. Pölten UAS 2023

### Physical therapy and good health care for people with disabilities

Educational Entrepreneur: Linda Lancere

<b>Title of the I Living Lab</b>	How might we ensure physical therapy and general good health care for people with disabilities?
<b>Challenge</b>	Students will be working to identify the needs and challenges of people with disabilities in sustaining regular physical activities as a part of an adequate health care. Potential digital or technological solutions are aimed to be found and prototyped. Background: People with disabilities have challenges with the movement adaptation in everyday life logistics, but in addition there is a high need to improve physical therapy in pre- and post-surgery period, and preventive therapy.
<b>Goal</b>	You will discover the challenges and the world of people with disabilities. You will work on possible solutions with high need and applicability in real-life practice. You will gain experience in working in a multi-disciplinary topic and team on user-centered solutions.
