

## E<sup>3</sup>UDRES<sup>2</sup> Intensive I Living Labs @ St. Pölten UAS 2023

### Cultural identity of small & smart cities

Educational Entrepreneur: Gaby Falböck

<b>Title of the I Living Lab</b>	How might we make the <b>cultural identity</b> of small and smart cities more visible?
<b>Challenge</b>	When we enter public spaces, we have descriptions and ideas about this place in mind. This knowledge affects our experience. The idea for this Intensive I Living Lab is to discover what places, spots and stories, cities like St. Pölten offer, and how we can share these impressions.
<b>Goal</b>	As a participant of this I Living Lab you will work on a narrative that represents the smart city. You will gain experiences in talking to stakeholders, visitors and commuters. The aim is to understand and communicate what the cultural identity of this city is. How can we make the colours, stories and faces more visible?
